

Flip Cart Instructions

Accomplish the same task as flash cards in a fun new way with easy to make flip cards. Follow the instructions below, or visit our online workshop section for downloadable instructions and patterns.

For animated instructions and templates, go to: www.azlearningbug.com/workshops/tips/flipcard

Pages two and three of this document contain an editable template for making three flip cards from regular cardstock paper. Edit the text on the templates, and print pages two and three back to back on an 8 1/2 x 11 inch sheet of cardstock. Cut and fold along the lines as directed to finish the cards.

Step 1: You'll need one 3x5 card for each flip card. You can make flip cards from any size cardstock paper, but 3x5 cards work well.

Step 2: Draw a vertical line every inch, dividing the card into five equal columns. Draw a horizontal line 3/4 inches from the top, and another horizontal line 3/4 inches from the bottom.

Step 3: Cut along the solid lines as shown. Discard the 1/4 inch pieces shown in grey.

Step 4: Fold along the dotted lines as illustrated. Do not fold the center section. Fold the left side of the card away from you, and the right side of the card toward you.

Step 5: Label the card. Write the question on the front of the center section and the answer on the reverse.

To Use: Start with the card open. Push the sides of the card toward each other to "flip" the center section and reveal the answer.

**The Food Guide
Pyramid**

How many servings of
fruit should you have
each day?

CARD 1
